## 👤 Professional Profile

---

I am a philosopher and a logician graduated from the National Autonomous University of Mexico and the University of Toulouse II, and a natural communicator. I've worked in academia for 15+ years and successfully instilled my passion for mathematical logic and the humanities in a great many of my students. Recently, I have obtained my MIT/xPRO professional certificate in full-stack development with MERN, and I am presently pursuing new professional paths as a front- and back-end developer.

¡Río Loco! Festival is a major French artistic festival held annually in the city of Toulouse.
